General information for panels and cladding

Maintenance: Use normal cleaning agents i.e. hot soapy water and a soft cloth or sponge. Solvents are not recommended, neither should aggressive cleaning agents be used.

Performance: Plastivan Decor is for internal use only, when installed and maintained as per our instructions, the product is covered by a 10 year guarantee against crazing or fading due to U.V light. Only a low tack masking tape may be used during installation and must be removed immediately afterwards.

Preparation: During the course of manufacture some variation in shade or pattern can occur. Sufficient panels for the area to be covered should be obtained in one consignment, all of the same production date (found on reverse of boards) to ensure a supply of compatible shades.

Please ensure that the builder or installer is aware of this information as no liability can be accepted once panels have been fitted.

Fitting instructions available on website below.
